Not too long ago you may have noticed a change if you diligently watch your product stars. After these stars, used to be the word "reviews" that linked to the review section for a product. Amazon quietly changed it to "ratings," as shown below.

Helpful Votes: Shown in purple above. Shoppers can vote on a rating if it helped them understand a product. The number of people that found a review helpful is displayed to help searchers find more helpful reviews more easily. Helpful reviews are also moved to the top of the ratings list.

Sexual in nature

Against any of the other guidelines that Amazon includes.

Ratings that include these issues can be reported by emailing community-help@amazon.com, or clicking "Report Abuse" in the individual rating. The rating is then reviewed by Amazon moderators, who may remove it at their discretion. I have seen reviews removed because of incentives; improper seller communications; too many reviews posted from the same Amazon account within a certain time frame; and because a reviewer had a personal or professional relationship with the product they reviewed.

The removal of all the product's reviews and preventing the product from receiving future reviews or ratings.

Depending on how you work with Amazon, there are two options. Vendors have access to the Vine Program and sellers have access to the Early Reviewer Program. Each program works a little differently.
